NEW PRODUCT

Picasso é um mármore extraordinário. Como um gênio da pintura, o traço extravagante dos seus veios combina-se com as tonalidades explosivas do fogo para criar ambientes surpreendentes e cativantes. A aplicação em simetria das chapas de Picasso cria verdadeiras obras primas que não deixam ninguém indiferente. E graças à baixa opacidade da pedra, o recurso à retro-iluminação transforma este mármore numa tela hipnótica e deslumbrante.

Picasso is an extraordinary marble. Like a genius of painting, the extravagant trace of its veins is combined with the explosive hues of fire, developing surprising and captivating atmospheres. The bookmatched application of Picasso slabs creates true masterpieces, leaving no one indifferent. As a result of the stone's low opacity, backlighting it transforms the marble into a stunning, hypnotic canvas.

CREME PARDAIS

Os tons quentes e fortes, raiados de negro, castanho e cor de areia fazem do Creme Pardais um mármore original. Tudo nele lembra a aridez e o fascínio do deserto, a suavidade das dunas e a aspereza das rochas. Cortado por veios fortes e dramáticos, onde flutuam fragmentos coloridos, ou decorado muito ligeiramente por difusas linhas cor de mel, esta é uma pedra que oferece a qualquer ambiente a presença deslumbrante do mundo natural.

Its hot, strong tones, with black, brown and sand-coloured veins make Creme Pardais an original marble. Everything about it evokes the arid fascination of the desert, the smoothness of the dunes and the roughness of the rocks. Intersected by strong, dramatic nerving with floating fragments of colour, or lightly decorated by diffuse honey-coloured lines, this is a stone that conjures in any atmosphere the stunning presence of the natural world.

BLUETTE

Com tonalidades azuladas e grandes manchas de cinzento com nervuras negras, o mármore Blueette da pedreira da Fonte da Moura é uma pedra de grande sobriedade e frieza. A sua aplicação em simetria cria superfícies ao mesmo tempo austeras e espetaculares, que lembram o coração das montanhas ou a pelagem de animais exóticos.

Featuring blue hues and distinctive grey stains with black nerving, the Blueette marble from the Fonte da Moura quarry is a stone of great sobriety and coldness. Its bookmatched application creates surfaces that are both austere and spectacular, evoking the heart of the mountain or the fur of exotic animals.

BLUETTE

Com veios fluidos e aquáticos e tonalidades que variam entre o anilado e o areia, o Art Deco é um mármore cheio de romantismo, que cria à sua volta ambientes calmos e nostálgicos. Os seus desenhos são vagos, com movimentos contraditórios. Como uma mulher enigmática, o Art Deco é um mármore caprichoso e suave, com veias de sangue azul sob uma pele de marfim.

With fluid, aquatic veins and hues that vary between indigo and sand, the Art Deco is a marble that evokes romance, creating calm and nostalgic ambiances. The designs on its surface are vague, with opposing movements. Like an enigmatic woman, the Art Deco is a smooth and whimsical marble, with blue-blooded veins under an ivory skin.
